UX Designers
UI Designers
Web Designer
Visual Designer

MARKETING

SEO
PPC
Social Media

DATA SCIENCE & ANALYTICS

Machine Learning
NLP Data Engineers
Artificial Intelligence

TESTING

Automation
Manual
UAT

WHY CHOOSE TECHNET DIGITAL

TechNET Digital pride themselves on having hard working and driven consultants who are in touch with the Digital space. This means they have been through an intense 13 week training programme where they are assigned a vertical market to work within so that they can come become an expert in the field and build a solid network within this field.

By investing in consultants we feel that this will produce the best results to make sure that both

candidates and clients get the best possible service possible.

As an agency specialising in the Digital space we also cover both permanent and contract staff and offer a number of ways in which to resource the best candidates on the market.

This can be working on a contingency basis, Retainer, Executive search or MSP. This being dependent on the need of the client and how they aim to work.

HISTORY

TechNET Digital has been born off of the back of TechNET IT as we look to stay in touch with the ever changing landscape of technology. What this means is we are able to utilise TechNET IT and their 16 years' worth of trading as well as over 50 years' worth of Recruitment experience. The team has been formed with 7 experienced consultants who have a strong understanding of the Digital Era that we are working in, and this will then help us to further grow with the knowledge and experience we now have.

PROCESS

We like to follow a certain process when we get requirements through. This will be by taking full briefs from the hiring manager to ensure we have a great understanding for the position and subsequently this means that both parties will save time in the recruitment process and finding the right candidates as soon as possible.

Further to this we will then fully qualify the candidate and provide you with as much information on the candidates situation and also their relevant work experience to the role in hand.

We source our candidates from a number of different avenues, these being:

And then from the network of candidates we keep in contact with regularly for when the right role does come in.

I had the pleasure to work with TechNET Digital as my recruitment partner and support through my transition to my new position. I really appreciated the dedication they showed and the time they spent on finding answers to all my questions. While remaining professional, TechNET Digital kept a very personal approach throughout the whole process. I would highly recommend engaging TechNET Digital in any recruitment process.

Ebay | Global Organic Growth Program Manager at eBay

I had the pleasure of working with TechNET Digital for my latest career move to SKY. TechNET Digital were professional, personable and ensured that I was kept well informed at all times.

Even after I had been offered the job, TechNET Digital would contact me to ensure that I was happy with the role and even how my first day had gone; this kind of personal touch you don't get with anyone else as it really shows they have a genuine passion for what they do.

I wouldn't hesitate to recommend TechNET Digital to any future clients of theirs.

Sky | Java Software Developer at Sky

I've worked with TechNET Digital on several occasions now when recruiting, They always takes the time to understand the role and our needs as a business, and has a keen eye and ear when it comes to aligning recruits to these needs.
