

Megan Groves

> Front-end & Java Recruitment Specialist

I'm a Front-end & JavaScript recruitment specialist and strive to keep up to date with the latest framework and releases, which in the front-end world is usually every month. Coming from a creative background, I'm a critical thinker and problem solver and I seek to be a true recruitment partner, not just a supplier and want to help both candidates and clients with getting the best experience possible within the Frontend sector! Job hunting and recruitment is stressful enough, so I aim to make sure its as smooth as it can be for everyone involved. Change is inevitable, and with tech change is constant - so get excited about it!
